

Xerox Robotic Autoloader Duplicator

Efficient and Reliable Automated In-House Disc Production

The Xerox Robotic Autoloader Duplicator is a fast and convenient way to make numerous copies of CD's, DVD's, and/or Blu-ray discs. Having three offerings to choose from, (Standard CD/DVD, Blu-ray, or LightScribe Capable), makes the range of Xerox Robotic Autoloader Duplicators suitable for any user. Models offer disc capacities ranging from 25 up to 60 discs, which are copied via an automated arm.

Standalone operation

A Xerox Robotic Autoloader Duplicator can operate independently from a PC. The entire unit is operated from an easy to use LCD interface on the top front panel.

Automated Operation

The system will automatically load and unload the discs into the recording drives through the robotic arm for convenient and hands free operation.

Compact Size

Its compact size (slightly larger than a shoebox) and retractable input/output bins, allows this robotic loader to fit nearly any office space or environment.

Disc Labeling Capability

The Xerox Robotic Autoloader Duplicator offers a line of disc labeling models, using LightScribe technology, which allows the user to print custom labels directly onto the top side of LightScribe capable CD or DVD media.

Multi-Master Recognition Technology (MMRT)

This feature allows the user to load multiple masters at once to run multiple duplication jobs in succession. This process affords the user more time to dedicate to other matters rather than keeping a constant eye on the autoloader.
